

THE SECRET LLAMA AGENCY

WHITE PAPER

FEB. 2022

**Welcome to the
Secret Llama Agency.
You're not one of
those sneaky Alpacas
are you?**

LLAMAS VS. ALPACAS: THE NARRATIVE

The Alpacas started it, or so the Llama legend says. The feud began more than 2000 years ago. The Alpacas broke into Llama land and stole their most precious treasure, the Dalexion. A dandelion crystal with the power to create unlimited wealth when activated.

The Llamas have recently retrieved the Dalexion but are on high alert. The Alpacas are preparing a sneak attack. Their great leader, Alpacacino, has vowed to bring about the end of all Llamas and take back the dandelion crystal. He is calling their mission "The Great Alpacalypse".

LLAMAS VS. ALPACAS: THE NARRATIVE

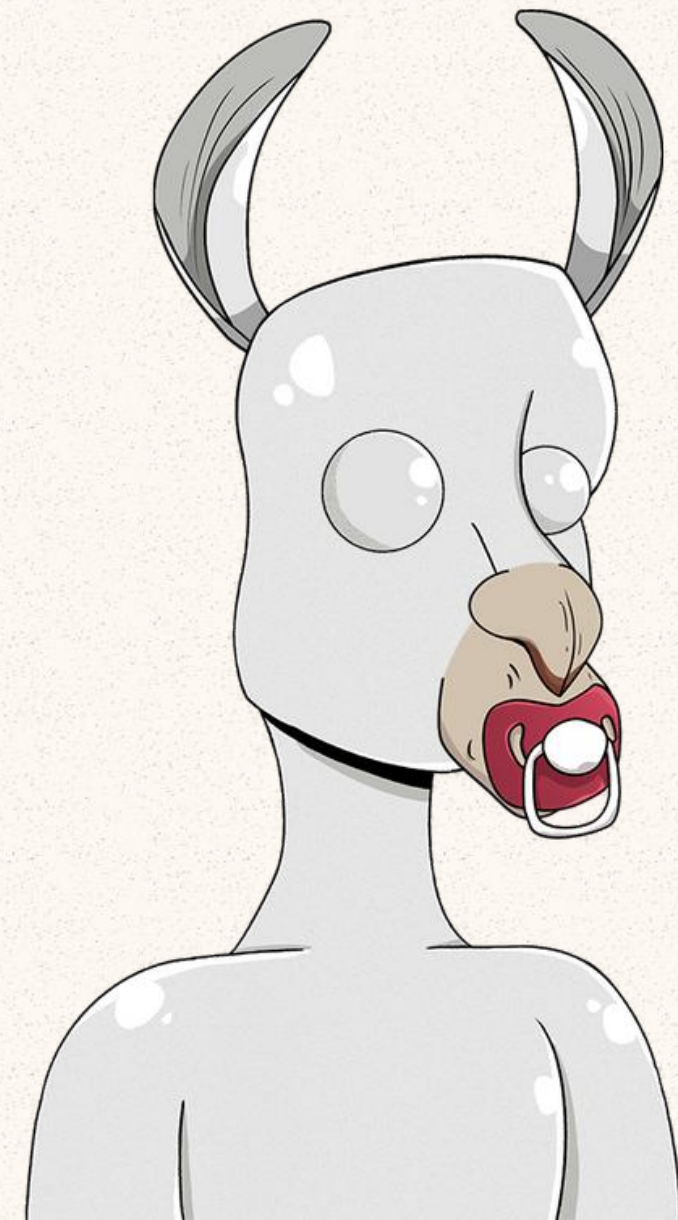

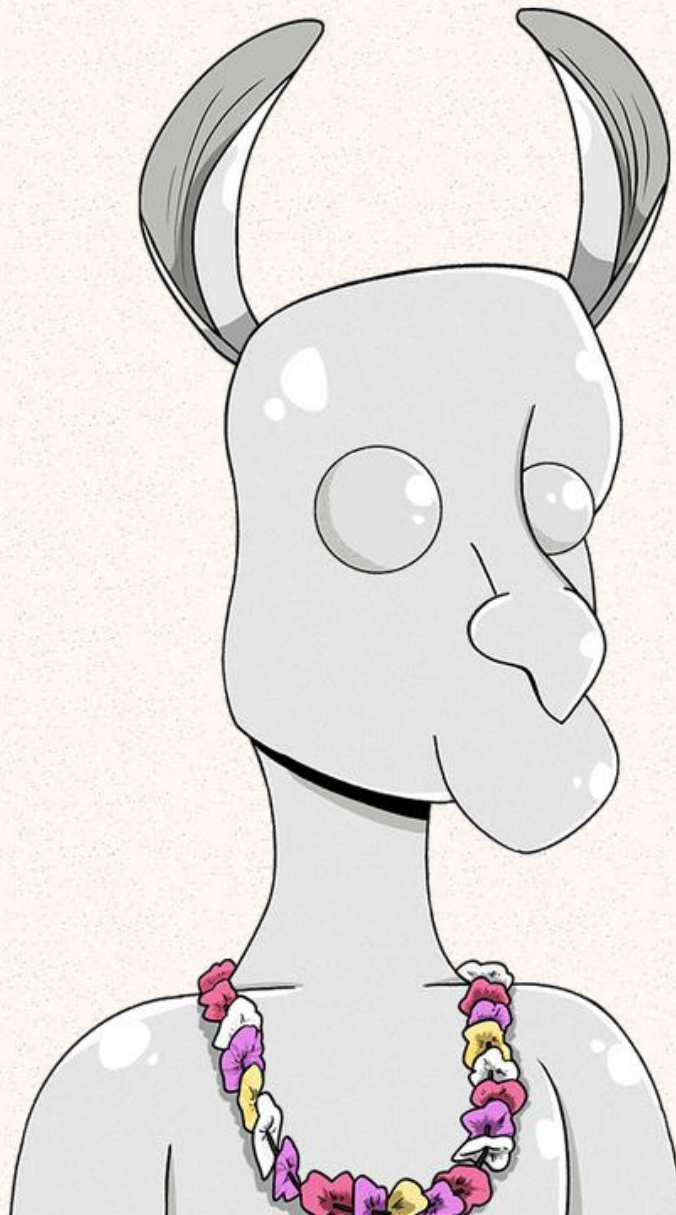

To protect themselves, the Llamas have established the Secret Llama Agency, or “SLA” for short. They recruit and train Llamas to safeguard their base and preserve the Dalexion.

However, they suspect some imposters are trying to sneak their way into their ranks. How will they ensure their new recruits are not Alpacas in disguise? SLA wouldn’t want their secrets to be revealed to the enemy. **To be continued...**

CUSTOMIZABLE TRAITS

The Secret Llama Agency is the first PFP project with customizable traits and aliases. Each trait is its own NFT. You get to choose whether you want to permanently combine your trait with your Llama Agent, hold or sell it on the secondary market.

HOW DOES IT WORK?

DAY 1

During pre-sale and public sale, you get to mint your Basic Llama Agent NFT.

Your Agent will come with 1 of 40 randomly generated background traits.

Once you have it, you can start staking right away!

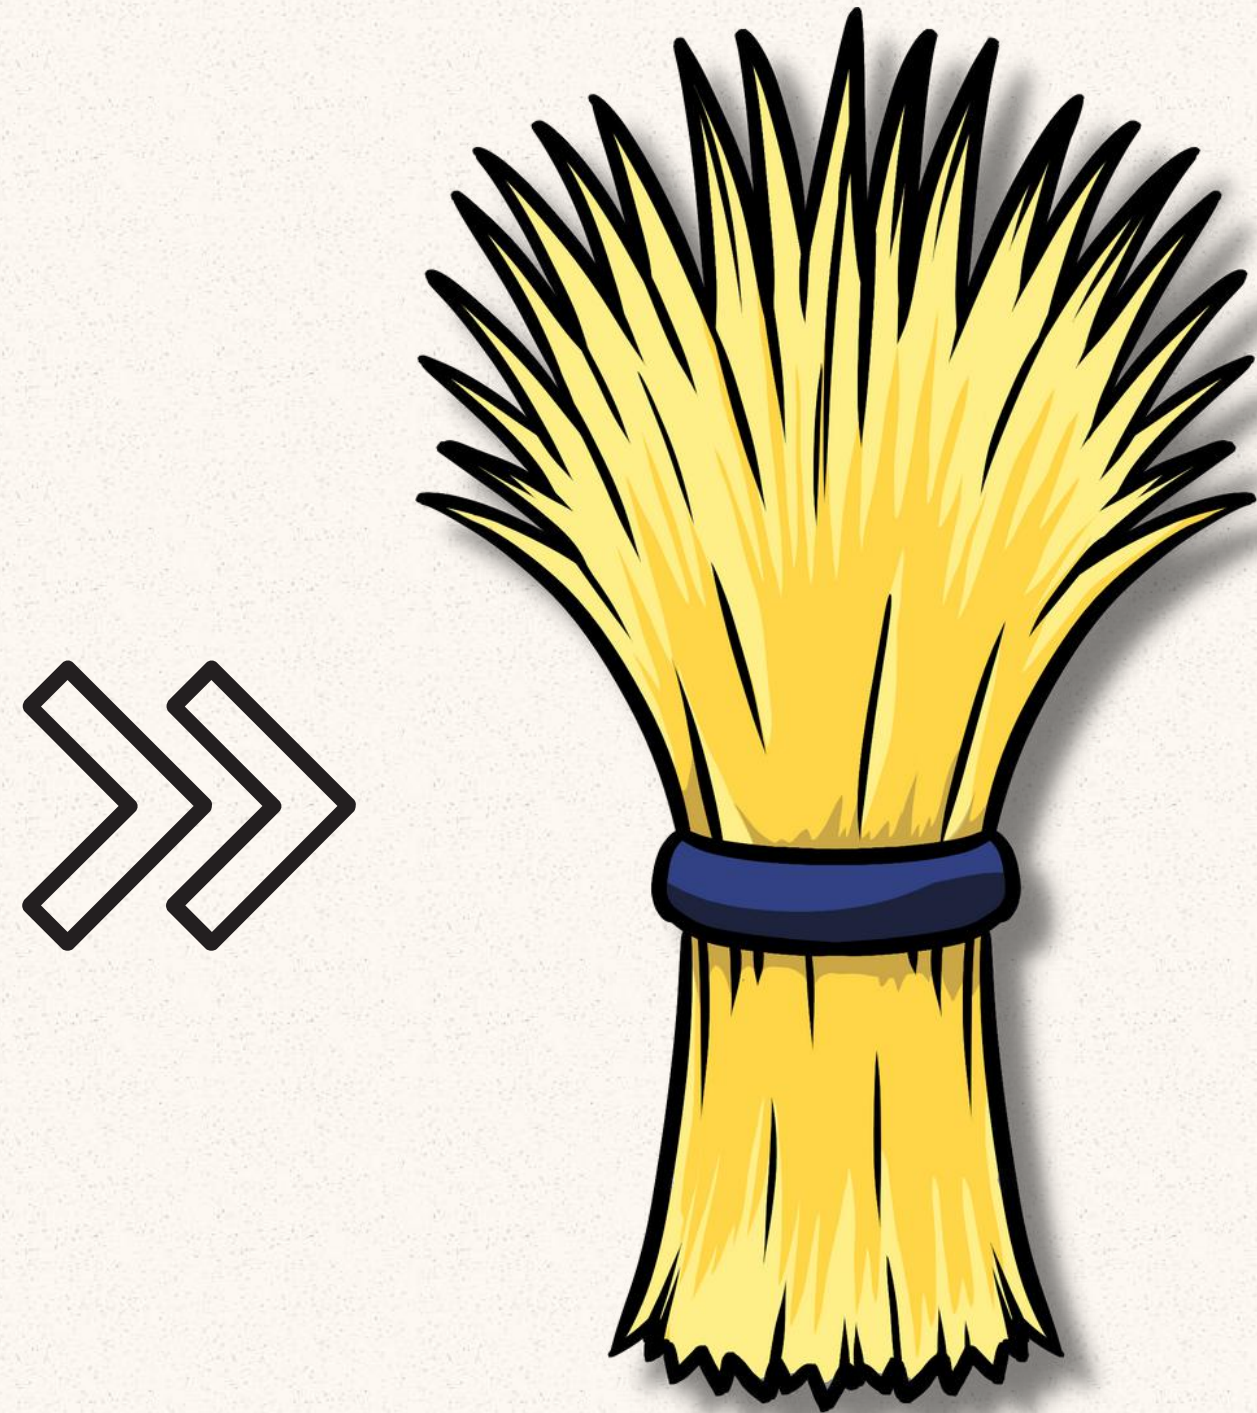

MINT

HOW DOES IT WORK?

DAY 2

Begin earning \$HAY, an SPL token used to run the Secret Llama Agency ecosystem. Every staked Llama Agent yields 2 \$HAY a day. A well deserved treat for keeping the Agency safe and completing secret agent missions.

\$HAY can be exchanged for Traits and many other things within our ecosystem, all of which will be covered in this whitepaper.

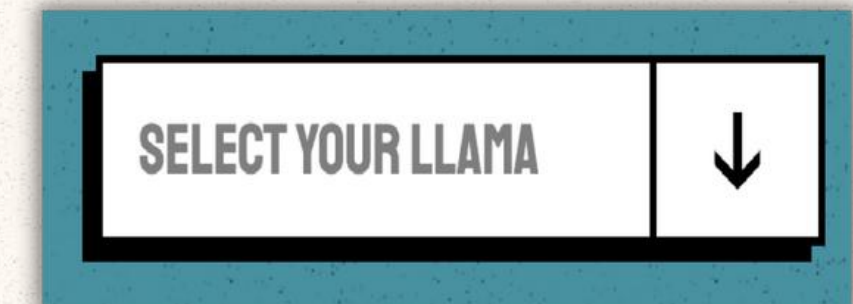

HOW DOES IT WORK?

DAY 2-5

As soon as you receive your \$HAY, you can start minting trait NFTs!

Enter *The Disguise Room* in the Agency, select your Llama Agent from the drop-down menu, and begin minting.

Minting will cost 2 \$HAY tokens for each trait. Minted traits are randomly generated from each category. The five categories are: skin, eyes, mouth, hats and clothing.

WHAT ELSE CAN YOU USE \$HAY FOR?

ID CARDS

Every Secret Agent needs an alias. Get yourself an ID Card for 60 \$HAY and combine it with your Llama Agent to get a custom name.

PROMOTIONS

Only loyal Agents holding at least 60 \$HAY in their wallet can get access to *The Ceremonial Hall*. Once you're in, you can mint promotion badges and combine them with your Agent as a trait to earn extra \$HAY daily.

Arbitrage Opportunity

Blue chip NFTs and new project NFTs will be purchased using the community wallet funds and listed on our *Agency marketplace* to be bought with \$HAY. Some examples include SMB, Degods and Boryoku Dragons.

More to come!

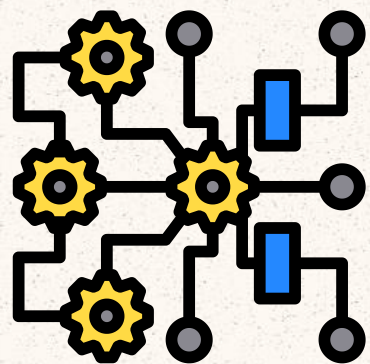

AGENCY MARKETPLACE

At chapter 3 of the roadmap, an exclusive Discord channel will open up for Llama Agent holders from which they can share their thoughts on the future of the project and vote on which NFTs they'd like to have in the *Agency Marketplace*.

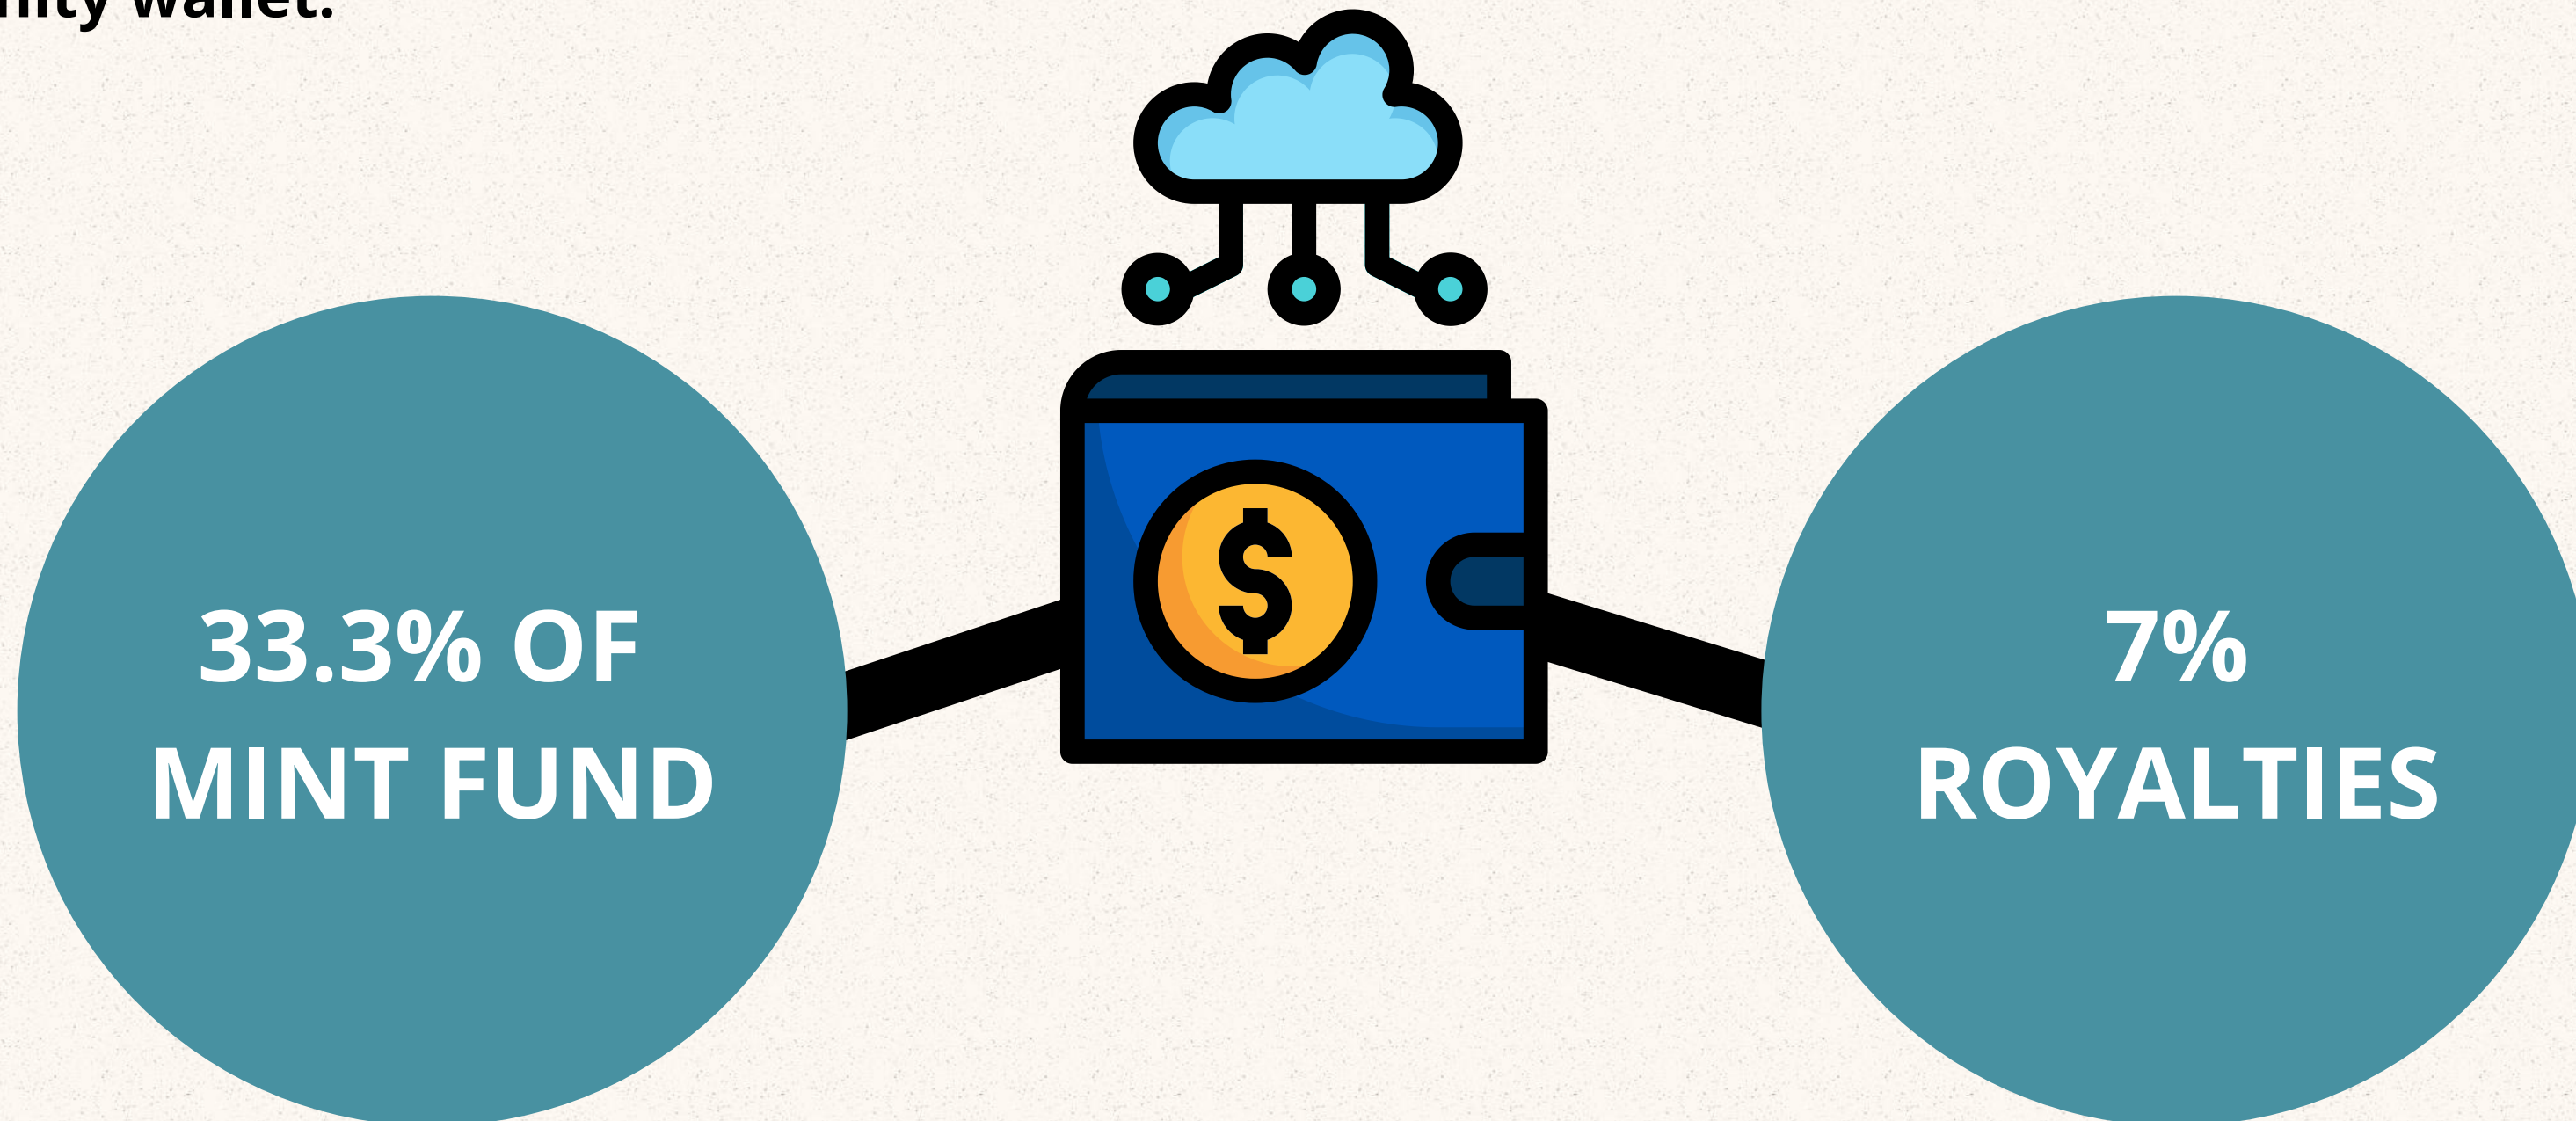

Blue chip NFTs will be purchased using the community wallet and listed on the Marketplace where they can **ONLY** be bought using \$HAY, driving up the value of the token and Llama Agents.

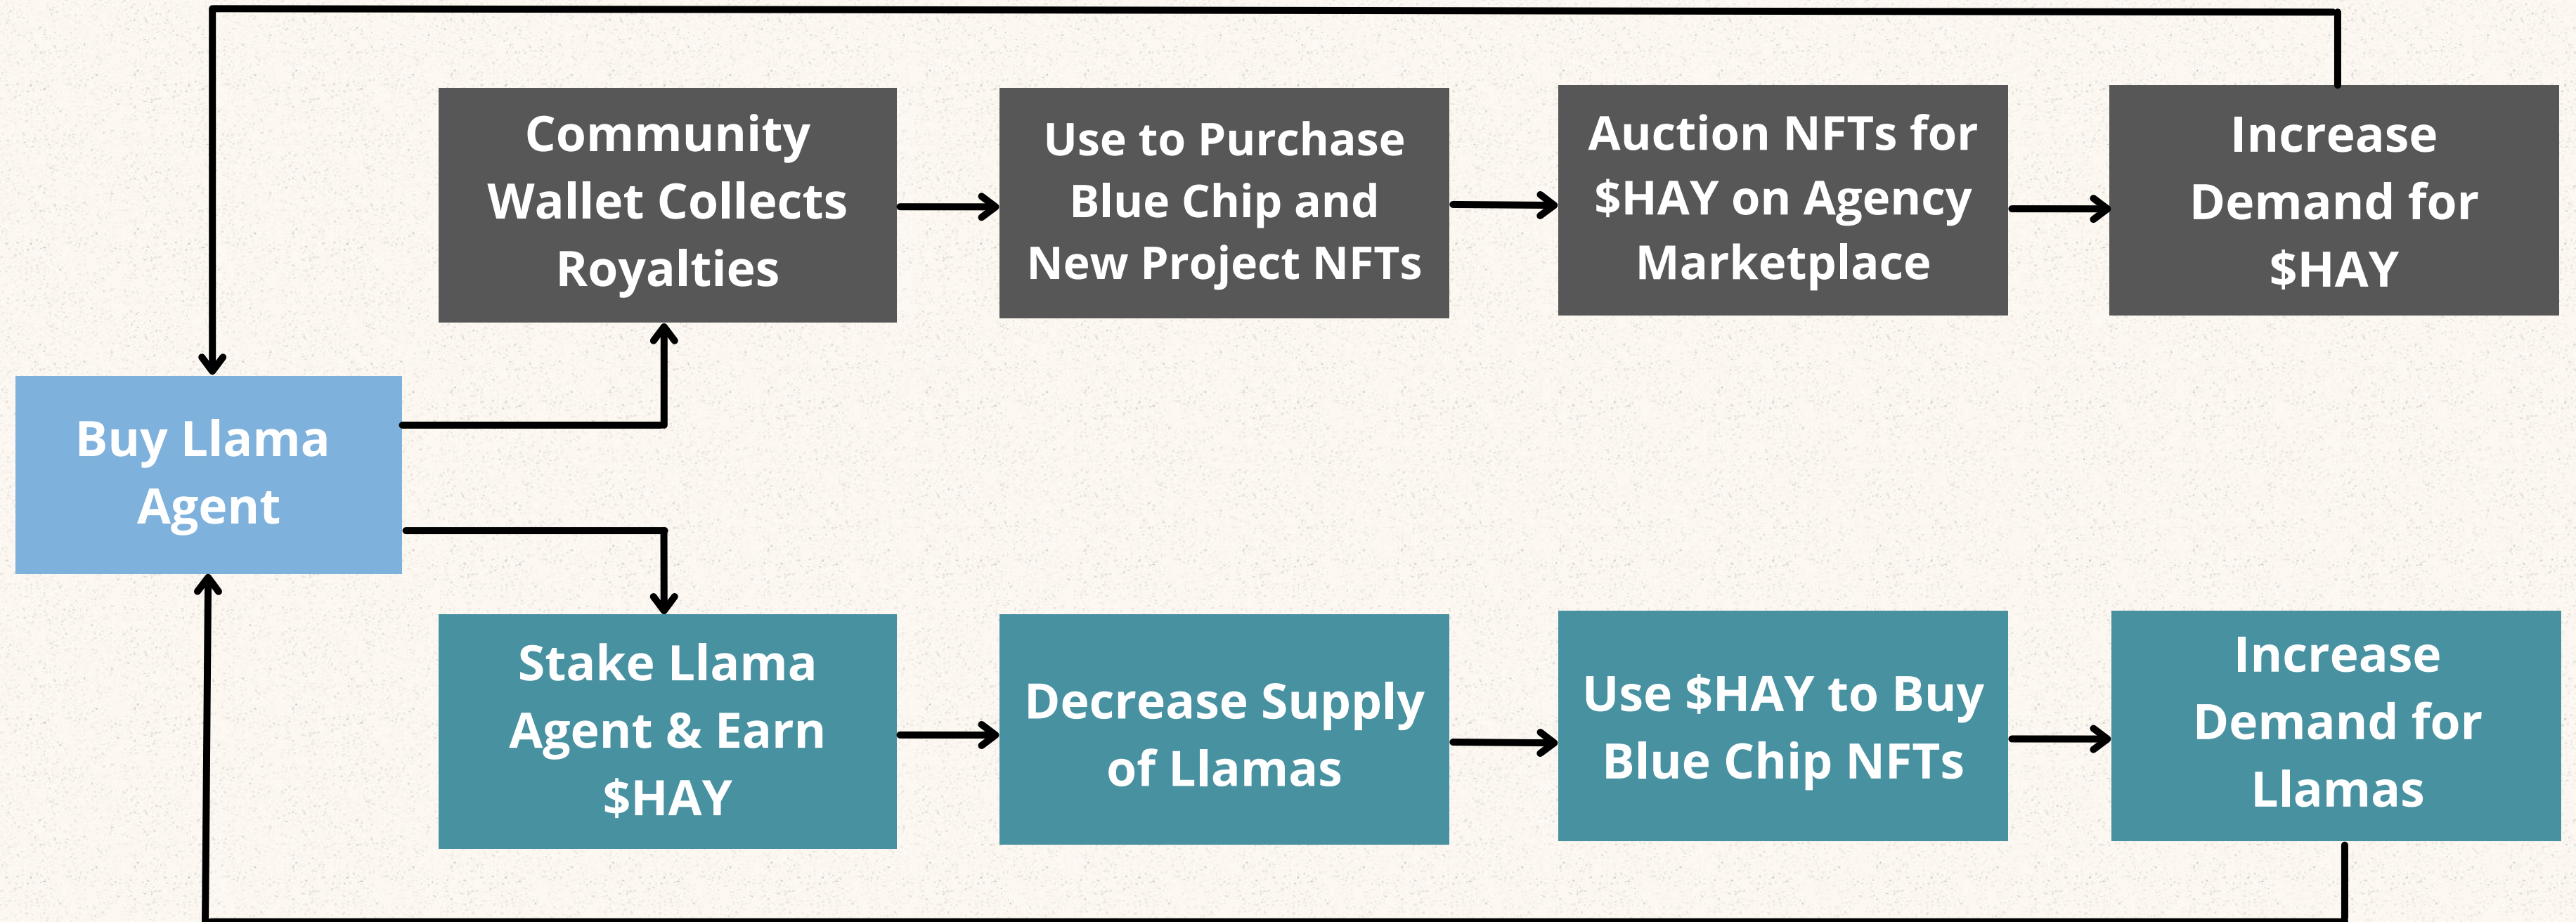

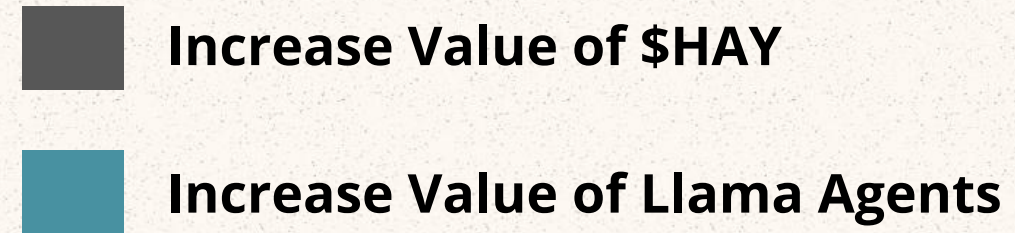

The marketplace is only the beginning for possible uses of \$HAY. Our goal is to integrate it's utility into some of the biggest projects within the Solana ecosystem. Examples include PVE and PVP games, well known marketplaces and more!

COMMUNITY WALLET

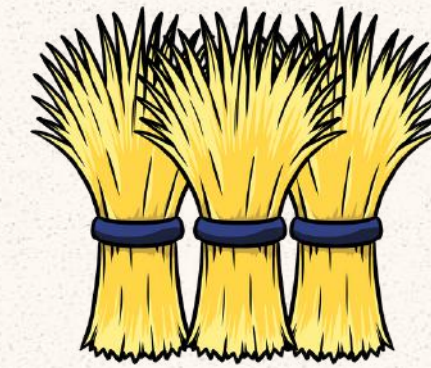

The community wallet will start off with 33.3% of the mint fund. With a mint price of 1.5 SOL and 6,000 Llama Agents, this is roughly 3,000 SOL. The wallet will continue to be replenished with royalties from secondary sales of the 33,000 NFTs within our ecosystem, including Llama Agents and trait NFTs (Skins, eyes, etc.). Out of the 10% royalty fee, 3% will go to the core team and 7% into the community wallet.

HOW TO EARN MORE \$HAY? PT. 2

1:1 SKINS

Owning a Llama Agent with one of the seven 1:1 skin traits earns you an extra +2 \$HAY a day. The legendary skins auction starts at Chapter 4 of the roadmap.

IMPOSTERS

If you're lucky enough to be holding one of the 25 Alpaca imposters you will earn +5 \$HAY a day.

THE IMPOSTERS

There are 25 Alpaca imposters hidden within the collection. Alpacas have shorter ears than Llamas and their backgrounds are displayed with a black vignette. The reveal will happen at chapter 7 of the Roadmap. A scanning device NFT will be released for you to scan your Llama Agent.

\$HAY SUPPLY & MORE

\$HAY is an SPL token created to run the Secret Llama Agency ecosystem. It is NOT an investment and has NO economic value.

The token will start with a supply of 0. The ONLY way it can be created, is by staking a Llama Agent. No IDO, no VC allocations and no pumps and dumps. Instead of having an initial USD or SOL price, the token will find it's price through the free-market.

The maximum supply is 34,000,000 with 3 halvings where the staking rewards will be reduced in half.

- **First Halving: 18,242,357**
- **Second Halving: 27,246,724**
- **Third Halving: 31,748,908**

All \$HAY used for NFTs, auctions, etc. will go right into the community wallet and be used for the LP. 5% of this \$HAY will go to the core team.
